

FLAT BALE OPENER B02000

FLAT BALE OPENER FOR INNER SPRING UNITS

introduction

A safe, convenient and easy way to unpack flat pressed inner-spring units, bundled in a bale.

flat bale opener

Maximum bale size 200 x 200 cm (80"x80").

Safety guards round the platforms prevents over spilling and possible accidents when opening.

Maximum opening, distance between top and bottom platform, 245 cm (97")

Useful opening 218 cm (86").

Can open more than 8 bales an hour.

The motorized screw type action provides extra safety and durability.

Can open any type of spring units with or without frame.

Emergency sensors round the top moving platform stops the machine in case of blockage.

model B02000

operation

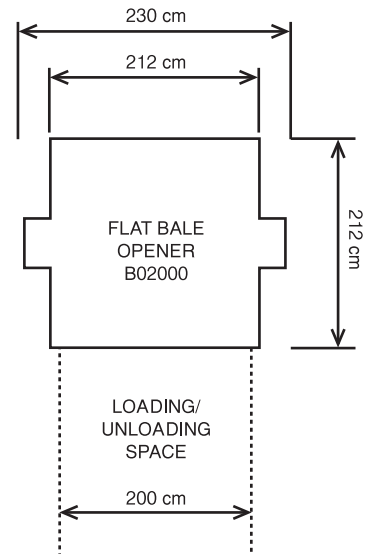

The bale is positioned on the lower platform. The top platform with a built-in sensor ensures that it will automatically come to a halt just above the bale when lowered.

Through the top platform, the straps are cut and then the platform is raised to release the spring units to be collected.

Power requirement: 3 kW three phase
Shipping Weight: 1250 kg
Dimensions: 230 x 212 x 300 cm height

Working space required
